- Excellent communication skills both verbal and written.
- Energy, drive and proactive behavior is necessary in the job.
- Experience from the wind energy industry will be an advantage.
- Flexibility to travel up to 30 days a year.

### **Avanti Wind Systems offers:**

- An exciting job in an international growth company with the financial strengths to pursue future possibilities.
- Salary will be depending on your qualification and experience.

**About Avanti Wind Systems:**

Avanti Wind Systems is leading world market producer of service lifts and other personal safety systems to wind turbine towers. Avanti Wind Systems was founded in Denmark in 1885 and was originally a ladder factory. The company still produces ladders, but is now focusing on developing and producing safety equipment for the service technicians working in wind turbine towers.

Avanti has developed a complete range of safety products for moving up and down in wind turbine towers. Avanti Wind Systems products such as service lifts, ladders with built-in fall protection safety rail and climbing assistance have been approved in accordance with official standards in the European Union, Australia and the United States.

Avanti Wind Systems has installed more than 16.000 service lifts in wind turbine towers throughout the world, which is more than half of all those installed.

Avanti Wind Systems' headquarters is located in Denmark with offices, training centers and factories in the United States, China, United Kingdom, Spain, China, Germany, India, Australia and Brazil.

**Avanti Wind Systems Values:**

Avanti Wind Systems wants to ensure that the company meets all environmental legal requirements in every respect. Avanti is part of an industry working with sustainable and non-polluting energy production meaning that we are constantly focusing on the environment.

Avanti Wind Systems will ensure that the company meets all legal requirements on occupational health and safety. Our personnel are the company's most important resource, and their safety and health are of crucial importance.
